PROFESSIONAL SUMMARY

Java Developer with 2 years of experience designing, developing, and maintaining web applications and RESTful services at Exads IT Solutions. Skilled in Core Java, Spring Boot, Hibernate, and SQL, with a strong understanding of object-oriented design, microservices architecture, and Agile development practices. Proven ability to write clean, efficient, and testable code while collaborating effectively with cross-functional teams to deliver scalable solutions.

TECHNICAL SKILLS

Languages: Java (8/11), SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JUnit, Mockito, Node js, React js, / Angular

Databases: MySQL, PostgreSQL, Oracle DB

Tools & Platforms: Git, GitHub, Maven, Jenkins, Docker, Postman, JIRA

Concepts: REST APIs, Microservices, OOP & Design Patterns, Agile/Scrum, Unit Testing, CI/CD

IDEs: Eclipse, IntelliJ IDEA, VS Code

WORK EXPERIENCE

Java Developer | Exads IT Solutions, Pune, India

June 2024 – Present

- Designed, developed, and maintained RESTful web services using Java, Spring Boot, and Hibernate, supporting over 10,000 daily active users.
- Implemented microservices-based modules for order processing and reporting, improving system scalability and reducing response time by 25%.
- Wrote optimized SQL queries and stored procedures in MySQL/PostgreSQL, improving data retrieval performance for large datasets.
- Collaborated with front-end developers and QA engineers in an Agile/Scrum environment, participating in sprint planning, daily stand-ups, and code reviews.
- Developed unit and integration tests using JUnit and Mockito, achieving over 85% code coverage and reducing production defects.
- Integrated third-party APIs and internal services, ensuring secure authentication using Spring Security and JWT.
- Used Git for version control and Jenkins for CI/CD pipelines, streamlining build and deployment processes.
- Debugged and resolved production issues, performing root-cause analysis and implementing long-term fixes.

PROJECTS

Employee Management System | Java, Spring Boot, Hibernate, MySQL, Thymeleaf

- Designed and developed a full-stack web application to manage employee records, attendance, and payroll for an organization with 500+ employees, replacing a manual spreadsheet-based process.
- Built RESTful CRUD APIs using Spring Boot and Spring Data JPA, and integrated them with a Thymeleaf-based front end to provide HR staff with an intuitive, responsive interface.
- Modeled a normalized relational schema in MySQL to manage employee, department, attendance, and payroll data, ensuring data integrity through proper foreign key constraints and validations.
- Implemented role-based access control (Admin, HR, Employee) using Spring Security, restricting sensitive payroll operations to authorized roles only.
- Automated monthly payroll calculations based on attendance records, reducing manual HR effort and eliminating calculation errors.
- Containerized the application using Docker to ensure consistent deployment across development and testing environments.

E-Commerce Order Management API | Java, Spring Boot, PostgreSQL, JWT, Postman

- Developed a scalable RESTful backend for an e-commerce platform to manage products, customer accounts, shopping carts, and order processing end-to-end.
- Designed a normalized PostgreSQL database schema covering products, categories, orders, and users, and optimized queries to support fast product search and filtering.
- Implemented pagination, sorting, and filtering for product listing APIs, improving response times for large product catalogs.
- Secured all API endpoints using JWT-based authentication and authorization, protecting customer data and restricting order/admin actions to verified users.
- Built order-status workflows (Placed, Shipped, Delivered, Cancelled) with proper validation to prevent invalid state transitions.
- Thoroughly tested all endpoints using Postman collections and JUnit test cases, ensuring reliability before integration with the front end.

EDUCATION

Bachelor of Technology – Computer Science & Engineering

SSVPS's Bapusaheb Shivajirao Deore College of Engineering, Dhule
CGPA: 8.76 / 10 — Distinction | 2019 – 2023

CERTIFICATIONS

- Java Full Stack Development Certification ([view credential](#))
- Aviatrix Multicloud Networking Certification ([view credential](#))
